Are you looking for ways to reduce your farm's energy costs? If you feel you are paying too much for energy, make plans to attend the Powering Michigan Agriculture Conference.

- Learn more about energy conservation practices and renewable energy technologies (wind, solar, biomass, geothermal, lighting and anaerobic digestion) available to Michigan farms.
- Equip yourself with the necessary information to identify which energy conservation practices and/or renewable energy technologies are most suited to help meet your energy management goals.
- Discover the tools and resources needed to implement these practices and technologies on your farm.
- Gain information on project funding opportunities.

**DATE:** Thursday, March 9, 2017  
**TIME:** 8:30 a.m. – 4 p.m.  
**LOCATION:** Kellogg Hotel and Conference Center, Big Ten C 219 S. Harrison Rd,  
East Lansing, MI 48824
